

The European Network of Crystal Growth (ENCG), the Institute Chimie-ParisTech (ENSCP), the Institute of Physico-Chemical Biology (IBPC) and the French Committee for Crystal Growth (CFCC-AFC) are pleased to welcome you in Paris, France, from Monday, July 25th, to Wednesday, July 27th, 2022 to attend the 7th European Conference on Crystal Growth (ECCG7), which will be held at the Novotel Paris Est Conference Center.

Prior to ECCG7, the 5th European School on Crystal Growth (ESCG3) will be organized for young researchers from Wednesday, July 20th, to Saturday, July 23rd, 2022, at ENSCP and IBPC, in the *Quartier Latin* district.

ECCG7 is a significant international scientific event that encompasses the condensed matter physics, biological crystallization and chemistry communities that are involved in phase formation and crystal growth. The conference program includes sessions covering the most advanced research in all topics of crystal growth phenomena, theory, experiments and applications including several tens of plenary and invited talks.

You are most welcome to attend ECCG7 !
